- 326 Contribute to the prevention and management of challenging behaviour (Children & Young People)
- 360 Move and position individuals (Adult)
- ...and many others

Health & Social Care

What are NVQ's?

To study for a National Vocational Qualification is to learn relevant workplace skills. They range from basic work activities at level 1 to senior management at level 5. Most Apprentices work towards Level 2 or 3. NVQs meet standards set by national, employer-led organisations. As a Beneast Apprentice you typically spend one day a week in study, either in your place of work or at one of our training centres. The emphasis is on gaining practical skills and abilities.

What are Functional Skills?

Functional Skills are the everyday abilities all employers need from their staff. Apprentices who need help with essentials like Literacy, Numeracy and ICT will be given specialist, one-to-one coaching by Beneast to help them gain these Skills. These developed skills are tested via an online test, undertaken at a Beneast Training Centre or in the workplace.

What are Technical Certificates?

Technical Certificates are additional qualifications which match specific aspects of the job to boost an Apprentice's knowledge and understanding. These are nationally recognised qualifications linked to your industry needs.

How is it Delivered?

The qualification is delivered as part of the Apprenticeship Programme. The awarding body is the City & Guilds.

Group workshops are delivered either in the workplace or training centre to enhance knowledge and understanding and as assignments are completed they are linked to each unit. All work is integrated with the NVQ and Functional Skills.

Assessment

The NVQ is achieved by gathering a portfolio of evidence, using a variety of assessment methods either paper-based or via an electronic portfolio - or a combination of both.
